Insights :

- STP up from 23% to 33% while SLA breaches fell from 34% to 28%.
- Digital channels run about 4x the STP of Branch and Distributor.
- Revival, Surrender and Policy Loan are the slowest request types.

Note:

39 records with data quality issues excluded (duplicates, missing or invalid dates, missing reject reasons). STP % = requests with no manual touch ÷ all requests. SLA: 3 days for simple requests, 7 days for Loan, Surrender and Revival. Synthetic data
